

# Jamie Wong-Li - Golden Child

Jamie Wong-Li is a "Golden Child"! Having successfully released her debut album in Switzerland the singer born in Hongkong is now starting her international career! Headliner in Cannes, the opening night of MIDEM, live tours through Germany and Switzerland and the release of "Golden Child" in Germany/Austria by O-Tone Music (distributed by Edel) are the first highlights of '08.

Jamie Wong-Li sings as beautiful as her name sounds! With her exceptionally expressive voice she can touch every audience and on stage she is intense and naturally present. Together with songwriter, pianist and producer Andreas Michel she has composed original music combining elements of jazz, pop and Brazilian styles. These songs are passionate – full of melancholy and profoundness – yet they're always carried by a unique sense of reconciliation. The grasping melodies and the honest poetry remain simple and leave the listener deeply moved. Jamie's touching performance and the acoustic arrangements underline the warm feel of this music.
